

CENTER POINT STEREO

Spacestation v.3 Stereo Powered Monitor

The cure for the common gig!

Groundbreaking technology...

The CPS Spacestation v.3 is a compact, powered stereo monitor that creates a unique 300-degree 3D stereo sound field from a single cabinet.

The CPS 'magic' works by **electronically** encoding the stereo Left and Right signals to be Mid (L+R) and Side (L-R) signals, then decoding them **acoustically** via the unique Front and Side dipole-powered speaker array. CPS creates a magical 3D stereo sound field that never 'collapses' as with all conventional stereo speaker arrays. The 'sweet spot' is **EVERYWHERE** — even traveling around corners and into adjacent rooms!

The CPS Spacestation v.3's front speaker is a custom-made 8" co-ax speaker (by Eminence USA), a 1" compression driver (by Eminence USA) and a super-tweeter tri-amped with independent level adjustment for the mids and highs via our Speaker Contour controls. The side speaker is a 6.5" full range speaker positioned 90 degrees off-axis.

The Width Control allows for optimizing the stereo effect to compensate for room acoustics (e.g. use more width for a dead room or outdoors and less width for live or highly reflective rooms). There is also a sub woofer output, useful for larger venues.

The CPS Spacestation v.3 is perfect for amplifying all stereo sources (stereo-based keyboards, for example) and is a one-source audio solution for small ensemble live productions. Every player will have perfect monitoring and will hear exactly the same mix as the audience.

Additionally, the Spacestation replaces a half-dozen amps, which enhances the clarity and intelligibility of the performance for the audience, who will not have to scream to be heard above the music.

The CPS Spacestation v.3 is the perfect solution for small to medium-sized live performance venues!

Features

- Stereo sound from one cabinet
- CPS patented 300° dispersion
- Works for keyboards and PA
- Master Level control
- Stereo Width level control
- 3-way Tri-amp front speaker
- Eminence (USA) Acoustinator CX2008 8" speaker
- Eminence (USA) APT-50 1" compression mid driver
- Speaker Contour Controls
- Sub woofer output (line level)
- Compact and lightweight
- Average 106dB max SPL (read: LOUD!)

Specifications

- Inputs:**
STEREO 1/4" phone jacks for instrument and line level signals (-10dBu to +10dBu)
- Output:**
Sub-woofer line level 1/4" phone jack
- Power:**
100 watts RMS to Front 8" woofer
100 watts RMS to 6.5" side speaker
40 watts RMS to 1" midrange driver
40 watts RMS to super tweeter
@ 0.009% typical, 0.1% max. THD
@ 100Hz to 20kHz usable
120 VAC @ 3A (230 VAC @ 1.5A)
- Dimensions:**
18" high x 11" deep x 11" wide
- Weight:**
32 lbs (14.5 kg)
