

CENTER POINT STEREO: **Spacestation XL**

'Stereo Everywhere' from a single cabinet...but louder!

From the first listen, musicians and audiences alike knew that the patented technology behind the CPS Spacestation v.3 amp was the future for live performance.

Thousands of 5 star reviews and millions of Internet views later confirmed it: **CPS is the audio equivalent of the introduction of color TV to an audio world still stuck in 'mono-tone' black and white!** Our new CPS Spacestation XL delivers what our CPS family had been asking for since the release of the SS3: More!

The SXL is twice the size, power and channels, taking the CPS 3D stereo magic to the next SPL level; the big stage! Over 700 watts of Class D watts in a Bi-Amped Front Speaker System comprised of a custom USA made Eminence 12" coax woofer, paired with a Titanium 1" mid driver, balanced with a Side Speaker System of two Eminence 6.5" side speakers in a new patented technology we call 'DTA': "Digital Transducer Alignment," that further expands the CPS 3D stereo effect.

The SXL offers two independent stereo TRS balanced channels with dual sensitivity for -10dB instruments or +4dB line level signals. Even the architecture of the SXL's front panel inputs is revolutionary with our patented 'offset inputs' that both protect and redirect the cables to the side and away from the speaker.

Rear panel stereo outputs allow for (mixed) pass-thru signals @ +4dB via 1/4" TRS or XLR outputs for Left, Right and L+R that can be used for FOH send, an additional amp or a powered Sub. The SXL produces 116+dB SPL of crystal clear and dynamically rich CPS 3D 'beyond stereo' sound, which must be heard to be believed!

Features

- Patented Center Point Stereo - 3D Stereo Everywhere!
- Patented 'DTA' Digital Transducer Alignment
- 50Hz to 20KHz response, no sub required!
- Two Balanced Stereo Channels with separate controls
- Dual Input Sensitivity; Hi (-10dB) or Lo (+4dB)
- +4dB Stereo Balanced Outs; Left, Right and L + R
- Patented 'Offset Inputs' protect and redirect cables
- Eminence USA Custom 12" Coax w/ Titanium Tweeter
- Strong and light all plywood construction
- Dual format design; carry or use vertically or horizontally

Specifications

Stereo Soundfield: 300 degrees
Loudness: +116dB SPL @.01% THD
Stereo Inputs (x2): Balanced 1/4" TRS
Balanced Outs: 1/4" TRS or XLR
Left, Right and L+R @ +4dB
Dimensions: 29"x17"x16" @ 65 lbs. (29 kgs)
